

Floor finish applicator

WAXXER

- **Able to apply different levels of viscosity to the floor**
- **Disposable valve & 50oz tank**

Should the Floor Finish Applicator valve become clogged with wax, due to not thoroughly cleaning and flushing the tool with hot water, then you can simply change the valve and the Waxxer is ready to work again.

If you leave the tank filled with wax, it will hardened over time, you can move the tank along with the valve (without any tools) throw it away and insert a replacement valve and tank.

The cost for a new bottle and valve will be minimal.

- **Carry Box Transport System**

If you have a large area to apply floor finisher, you can use the carry box which holds 2pcs. 50 oz bottles to cover 2,000 sqft.

- **Built in air valve on 50 oz tank**

The Lid has an air valve.

When you close the air valve, the tank will be 100% sealed and no leakage will occur during transportation or storage.

When you start to work, pull the air valve up to open and the tank is ready to release solution.

- **WAXXER tool size 22" or 16" wide**
- **WAXXER Floor Finish Applicator weights 2lbs empty and 4.5 to 5.5lbs filled with wax and very durable**
- **50oz tank will cover, approx. 900 to 1000 sqft.**
- **Cleaning of tool takes 3 - 5 min**
- **This WAXXER finish applicator is the only one on the market with these features!**
